PROFESSIONAL SUMMARY

Full Stack developer and technical lead experienced in enterprise systems and web products. I connect interfaces, APIs, authentication, and databases to address business needs and organize management workflows. I work with Oracle SQL and PL/SQL, React, Next.js, TypeScript, and Node.js. I use Codex and Claude to explore ideas and find practical solutions to complex problems.

PROFESSIONAL EXPERIENCE

Technical Lead / Analyst Programmer - Recursos Informáticos

May 2023 - Present | Córdoba, Argentina

- Functional analysis, development, and maintenance of business-critical software with Centura and OpenText Gupta Team Developer; reverse engineering of modules with limited documentation.
- Oracle SQL and PL/SQL development and optimization: queries, procedures, functions, packages, and business logic; reporting, data exports, and administrative processes.
- Production incident investigation and resolution, dependency analysis, and change validation in systems with decades of operation.
- Technical guidance, code review, and collaboration with developers, support teams, and clients. Gradual modernization of selected areas with React.

Full Stack Developer - Freelance and personal projects

February 2022 - Present

- Development of web applications and management systems for catalogs, inventory, orders, credits, and case workflows, with public interfaces and administrative workspaces.
- Integration of authentication, permissions, validated forms, and data persistence using Firebase or PostgreSQL and Prisma, depending on the project.

TECHNICAL SKILLS

Databases: Oracle Database, SQL, PL/SQL, PostgreSQL, MySQL, MongoDB, SQLBase, Cloud Firestore; data modeling and query optimization.

Backend: Node.js, Express, REST APIs, Java, Spring Boot, authentication, authorization, and external integrations.

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, Vite, React Hook Form, Zod.

Data and cloud: Prisma, Supabase, Firebase Authentication, Firebase Storage, Better Auth, Vercel.

Tools and quality: Git, GitHub, GitFlow, Jira, Postman, Axios, Visual Studio Code, API testing, Vitest, Playwright, code review, and technical documentation.

AI: Codex and Claude for ideation, exploring alternatives, and complex problem solving.

Other technologies: PHP, OpenText Gupta, Centura Team Developer, QRP reports, ZPL; functional analysis and legacy system modernization.

SELECTED PROJECTS

AutoGlobal - Dealership management and catalog

React, JavaScript, Material UI, Firebase, React Router, Tailwind CSS

- Public catalog connected to vehicle administration: creation, editing, stock, reservations, and sales, with role-based administrative access.
- Stock and analytics dashboards with date-range filters, WhatsApp inquiry metrics, and PDF and Excel exports. Operational stock loading works independently from analytics.

Chaioboutique - Retail management, e-commerce, and point of sale

Next.js, React, TypeScript, PostgreSQL, Prisma, Better Auth, Zod, Vitest, Playwright

- Modular application connecting the public store, customer accounts, administration, catalog, inventory, orders, and point of sale.
- Integration between interfaces and relational data, with sessions, permissions, and form validation on both client and server. Checkout flow and Mercado Pago integration.

GAMAAN - Financial platform and credit management

React, Vite, TypeScript, Firebase Authentication, Cloud Firestore, Firebase Storage, EmailJS

- Sole product owner from functional definition to deployment: credit simulation, applications, evaluation, and follow-up.
- Data modeling and private workspaces for users, agencies, and administrators, with role-based permissions, application statuses, an admin dashboard, and notifications.

Pactum - Case and document management

Next.js, React, TypeScript, Firebase, Firebase Admin, React Hook Form, Zod

- Guided requests and digital case files with data, documents, signers, and a private tracking workspace.
- Administrative workflow for review, costs, payments, and statuses, with permitted transitions and an action timeline per case.

EDUCATION AND TRAINING

Training through CoderHouse, Udemy, and EducaciónIT: web development, JavaScript, Node.js backend development, SQL, Oracle PL/SQL, and manual QA testing.

Universidad Nacional de Córdoba - Undergraduate degree in Social Communication, in progress.

OTHER PROJECTS

ZPL Label Designer: visual label editing for Zebra printers with React.

Heyday Reminders: reminders, contacts, and notifications with React Native and Expo.

LANGUAGES

Spanish: native. English: intermediate, spoken and written.
